

# Greenskeeper Super Shady Mixture

*Ideal for Shaded Lawns, Parks, and Play Areas*

Greenskeeper Super Shady Mixture is formulated for challenging areas with as little as two hours of sunlight, performing where other grasses fail due to shade or compaction while still tolerating some sun. With Poa supina for enhanced shade and traffic tolerance, it produces a durable, attractive turf that requires only moderate maintenance, low water and fertilization, and adapts well to sandy soils.

**Seeding Rate:** 4 to 5 pounds per 1,000 square feet

## Greenskeeper Super Shady Mix Composition

|     |  |                                   |
|-----|--|-----------------------------------|
| 25% |  | Shade Tolerant Kentucky Bluegrass |
| 25% |  | Creeping Red Fescue               |
| 25% |  | Improved Chewings Fescue          |
| 15% |  | Improved Perennial Ryegrass       |
| 5%  |  | Hard Fescue                       |
| 5%  |  | Supranova Poa Supina              |

Please note that varieties may vary depending on availability and newer varieties that come on the market.
